Installation Instructions

*Street Light Bar (Part # 150030)
2007-2008 Toyota Tundra*

07-08 Toyota Tundra Model 150030

Hardware Kit includes:

- 4) 3/8" x 1 1/2" Hex Bolts
- 10) 3/8" Flat Washers
- 6) 11/16" Hex Head Nuts
- 2) Mounting Brackets

Recommended Tools:

- 11/16 Wrench
- 9/16 Wrench

Step 1: Locate the two factory bumper mounts and remove all six nuts from the factory studs. Next locate the two "L" shaped N-fab brackets marked driver and passenger side. Starting with the driver side bracket, align the three holes in the bracket to the three factory stud locations.

NOTE: The angled part of the bracket with the two welded threaded mounts and slotted hole should be above the factory bumper studs.

Step 2: Start all three 11/16" nuts on the factory studs and torque to 15-20 ft/lbs. Repeat for the passenger side bracket.

Step 3: Carefully slide the light bar through the slotted hole in the bumper until the light bar brackets are aligned with the bumper mounted brackets. Next, using the 3/8" x 1 1/2" hex head bolts and 3/8" flat washers, start in each bolt location and hand tighten.

NOTE: Do not use the slotted hole in the center of the bracket.

Step 4: After final positioning, torque each bolt location to 15-20 ft/lbs.

This concludes the installation.

Products licensed to Smittybilt, a division of Transamerica Auto Parts, by Fichter Designs are protected by US patent law and International Copy Right law. US Patent # 6588783, # 6874801, # 7416202. Other patents and continuances pending. N-fab products configuration also protected by International Trade Dress Law. All Design and Patent infringements will be prosecuted to the full extent of the law.
