CLASS: SB 3 ISSUE: MONTH/YEAR: AUGUST 2011 PRODUCT HIGHLIGHT: SRC CAGE KIT

## SRC CAGE KIT

The all new reinforced cage kits come with everything you'll need to strengthen your factory roll bar into a solid foundation if a roll over takes place. We start off with 1020 .120 Wall DOM tubing which is one of the strongest material available. Each kit includes the new Knuckle System that attaches to the factory roll bar, using a unique pivot and fastening point which will be one of the strongest and the most solid mounts available for your Jeep®. All of our cages were engineered to bolt-in and require no modifications to the vehicle to ensure a rock solid install while creating the strongest cages kit available.

### FEATURES:

- Manufactured from 1020 .120" Wall DOM
- The Knuckle attaches using a unique pivot on one end and grade 10 fasteners on the other. Making it one of the strongest mounts available!
- Finished in a satin black powder coat and comes with a 5 year limited warranty
- No drill installation
- Works with all soft goods, factory and aftermarket tops
- Front down bars have built in tubular grab handles
- Main bars over driver/passenger section features a pad and cover for safety
- Requires modification to factory roll bar covers
- Smittybilt Advantage Warranty

DIRECT BOLT-ON

### CAGE KIT OVERHEAD

Main bars over drive passenger section feature a GEAR cover to provide extra storage space.

### BUILT IN GRAB HANDLES

Built in grab handles provide easy entry and exit points when getting in and out your vehicle.

### KNUCKLE SYSTEM

The new knuckle system uses DOM material which are then CNC machined to exacting specifications to ensure a rock solid mount every time.

### APPLICATION
