THE NEW LINE OF STAINLESS STEEL ACCESSORIES FOR THE 2007-08 Wrangler

has been completely redesigned to offer you the highest quality parts available. Each part starts off as chunk of solid 304 marine grade stainless steel. It's then cast in a pretreated mold which provides a part guaranteed to meet OEM Specifications every time. Once the casting is complete each part goes through an electrostatic polishing process that puts a high quality mirror finish. When you want a quality part that will fit and is built to last look to Smittybilt!
