- F** Light Brackets

THE ALL NEW

M1A2 HEAVY DUTY MODULAR TRUCK BUMPER

The all new M1A2 Heavy Duty Modular Truck Bumper gives you full control to transform your truck – depending on whether you want to conquer the toughest trails or simply make heads turn. The powerful, 1/8" steel bumper is smart-engineered for both strength and weight savings and the lower panels can be removed for better approach angles and tire clearance. The blazing 21" LED center light bar can be installed above your bumper to light up the darkest roads. Once off the trails, the modular design allows you to take out the winch and plate (without removal of the bumper) and install the main light bar inside the winch cavity, giving it a sleek, stylish display that will be the envy of any urbanite.

PRODUCT AVAILABILITY: STARTING MARCH 2018*

M1A2 Front Bumper

- Modern, modular design allows front bumper to go from winch to winchless with ease
- 1/8" steel frame makes it stronger and lighter, with less flex than traditional bumpers
- 1/4" steel winch cradle offers increased durability and load capacity
- 21" LED light bar and two 6" LED side lights included
- Winch cradle can be removed or installed without bumper removal
- Mesh panels improve airflow while protecting engine components
- Optional OE 3x3 lights can be installed behind mesh panels
- Fully compatible with OE sensor packages
- Radius to match OE styling
