NEW ARCTIC FRIDGE/FREEZER

52
QUART
AC/DC
MULTI VOLTAGE

Perfect for tropical or desert climates – the Arctic can freeze products even in blistering hot temperatures!

- Fast cool capability
 - Low power consumption
 - Anti-vibration design for harsh conditions
 - Interior LED light included
 - No heat radiation
 - Ideal for overland adventures
- // Camping // Motorhomes // Trailers // Marine

There's nothing better than pulling an icy, cold beverage or crisp, refreshing sandwich out of your Smittybilt Arctic Fridge/Freezer during a hot day out on the trail. The 52 quart is large enough for extended forays into the backcountry, yet still sized to easily fit in the back of most 4x4s.

The Arctic Fridge/Freezer's ultra-efficient compressor can run on 12 volt or 110 volt to provide temperatures as low as -22°F in conjunction with thick 55MM polyurethane insulation. State-of-the-art LED controls are recessed to protect them from damage or accidentally being altered, and the three-stage automatic power cut off to ensure that your vehicle's battery has enough reserve capacity to start the engine.

FREE COVER
