

STRYKER

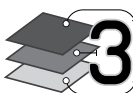

2018+ JEEP® JL / 2007-2018 JEEP® JK STRYKER REAR BUMPER

Smittybilt's new Stryker rear bumper is a perfect match with the modular front Stryker bumper. Ideal for rock crawling or everyday driving, blending strength with modern, aerodynamic styling and providing multiple options for supplemental lighting. Deep draw press-formed from 3mm cold rolled steel, the aggressive, stubby design allows for extreme off-roading while offering significant weight savings over standard steel. Integrated lift points and 7/8" D-ring mounts makes recovery a breeze.

- A** 3mm deep drawn formed steel
- B** Integrated D-ring and lift point fits up to 7/8" D-rings
- C** Auxiliary backup light cut outs
- D** Removable mesh panels for customization
- E** Raised corners for increased departure angles
