

# UNIVERSAL SYNTHETIC ROPES

Smittybilt introduces its all-new line of synthetic replacement winch ropes for safe, easy trail recovery. Your winch rope is a wearable item, yet extremely vital piece of your rig and needs to be replaced over time. Kink, fray, and other visible wear are signs that it's time to replace your winch rope. The new Universal Synthetic Ropes from Smittybilt are STRONG and MADE TO LAST, manufactured from 100% Spectra engineered fiber and tested under the toughest conditions so that you can be confident out on the trail. Available in 8,000lb, 10,000lb, 12,000lb and 15,000lb weight ratings providing options for a variety of uses and applications.

- A** Manufactured using 100% Spectra Engineered fiber
- B** Reinforced stainless steel thimble for added strength and resistance to the elements
- C** 16 ft heat resistant red braided sleeve protecting the end of the rope from abrasion and heat
- D** Red Braided sleeve provides visual indicator of the last 16ft of rope
- E** 4 1/4 foot durable polyester sliding sleeve on hook end for improved abrasion resistance and wear protection
- F** Removable Clevis hook for quick accessory change-out
- G** Compatible with most winch applications
- H** Upgrade to synthetic rope with ease

# HOOKLESS WINCH ROPE

Smittybilt introduces their all-new Hookless Winch Rope for the customer who has safety as a top priority. Trail recovery is unpredictable and rope breaks are inevitable, but with their new Hookless Winch Rope, Smittybilt reduces safety risk significantly by eliminating the weighted ballistics at the end of the rope. Smittybilt's hookless winch rope also provides maximum versatility, eliminating the need for additional shackles, hooks or other accessories and can be anchored to roll cages or steps easily, no need for a d-ring or other attachment.

- A** Design eliminates the need for shackles, hooks, or other accessories
- B** Rope is 3/8 inch x 98 feet
- C** Manufactured using 100% Spectra engineered fiber
- D** 4 1/4 foot durable polyester sliding sleeve on hook end for improved abrasion resistance and wear protection
- E** 16 ft heat resistant red braided sleeve protecting the end of the rope from abrasion and heat
- F** Red Braided sleeve provides visual indicator of the last 16ft of rope
- G** Compatible with most winch applications
- H** Upgrade to hookless winch rope with ease
- I** Makes attaching line/set-up quicker and safer
