

COMMAND SERIES DUAL-MOTOR AUTO STEPS NOW AVAILABLE

For Jeep and truck owners looking to add style to their lifted vehicles, Smittybilt introduces the Command Series Dual-Motor Electric Steps built to surpass the competition through its features and strengths. Featuring all-weather performance and legendary reliability with a 600-pound capacity on each side, the powerful steps automatically deploy and retract.

Made with safety in mind, the built-in resistance sensors will stop operation if an obstruction is sensed, preventing damage to the steps' motors or injury to passengers. When not in use, the running boards tuck under the vehicle, protecting rocker panels. Additionally, each step package comes with an override switch so that when the vehicle is on a trail or on a lift being serviced, the switch will deactivate step deployment, preventing any unintended damage. Sturdy end caps are installed to protect steps and reduce debris build-up.

Smittybilt's new Dual-Motor Electric Steps provide standard features that upgrade customers' vehicles, remain price competitive, and offer ease of use alongside a reliable five-year.

FEATURES & BENEFITS:

- A** All-weather performance
- B** Dual-motor functionality
- D** Overheat protection
- E** Powder-coated black military-grade aluminum
- F** IP68-certified rating, the running board remains watertight when submerged for longer periods
- G** Built-in resistance sensor stops the progress of the steps if an obstruction is detected
- H** Tough end caps reduce debris build-up while highlighting a low-profile, integrated LED light system adding visibility and a sharp contrast
- I** Improve ground clearance, full running board retracts when not in use, tucking under the vehicle and protecting its rocker panel
- J** Handle up to 600 pounds of load capacity while the step automatically deploys or retracts with the opening or closing of the vehicle door
