

HD PIVOT TIRE CARRIER FOR 21+ FORD® BRONCO

Being able to carry an oversized spare tire on the exterior tailgate is an important draw, and the new Bronco HD Pivot is up to the task.

Made of Monoblock aluminum material, the single-action tailgate operation features a quick and simple bolt-on installation and offers increased fortification of the tailgate, allowing up to a 40-inch spare. The tire mount is adjustable, thanks to chromoly mounting brackets, and maintains the easy, single action opening and closing of the tailgate.

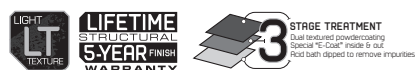

The auxiliary accessory mount eliminates tailgate sagging as well as rattles that would likely occur with an oversized tire attached to the stock bracket. The design allows for the third brake light & back-up camera will continue to function with the oversized tire in place.

Off-roaders who favor larger size tires will appreciate having a full-sized spare attached to the exterior of their Bronco, providing them with the security if a replacement is needed in remote locations. The Smittybilt HD Bronco Pivot will strengthen the Bronco tailgate and remove the stress placed on the vehicle's exterior structure.

Smittybilt recognizes the importance of the new Ford Bronco, along with its historical legacy, and has created the new Bronco HD Pivot to offer customers wanting to upgrade to an oversized exterior spare tire that needs increased strengthening from the tailgate. The single-action operation carries up to a 40-inch tire.

FEATURES & BENEFITS

- Made of Monoblock aluminum material
- Increase load carrying capacity of up to 135LBS.
- Adjustable tire mount with 40" maximum tire size, without fear of tailgate sagging
- Chromoly mounting brackets maintains the easy single action of opening and closing of the tailgate
