

SMITTYBILT ANGULAR DROP STEPS

The Smittybilt cab-length Angular Drop Steps offer a dual-purpose protection and functional vehicle entry. Matching the newest generation vehicle stylings, the Angular Drop Steps come with vehicle-specific mounting brackets and hardware, no drilling required.

The step's angled design offers the vehicle clean and clear side protection. Its wide step and unique hexagon design enhances the look of your vehicle and provides essential grip. The strength and durability of the full-steel construction is highlighted by a black powder coat finish that boosts corrosion resistance while accentuating a tough and rugged modern look. Our innovative design is one of Smittybilt's largest footprints when it comes to nerf steps.

The Angular Drop Step pad offers greater stability with its 13" x 4" size compared to our traditional Nerf Steps that are 10.5" x 2.5"

FEATURES & BENEFITS

- A** Full steel construction, offers strength, durability and confidence
- B** Large stepping area at every door, 13" inch stepping surface measuring at 4" inches deep
- C** Available in cab-only configuration
- D** Black powdercoat finish adds protection to the vehicle while off-roading
- E** Modular brackets allow for simple adjustment and easy installation
- F** Functional vehicle entry for lifted vehicles, practicality while maintaining tough, rugged appearance
- G** No drill, direct fit
