

NEW PRODUCT RELEASE
2020+ JEEP GLADIATOR JT

XRC GEN 3 REAR WINCH BUMPER

*Winch sold separately

The Smittybilt XRC Gen 3 Rear Winch Bumper is engineered for Jeep Gladiator owners who demand uncompromising strength, trail-proven functionality, and aggressive off-road styling. Designed specifically for the 2020+ Jeep Gladiator JT, this bumper delivers serious rear-end protection while integrating essential recovery and utility features for demanding environments. Constructed from 3/16-inch cold-rolled steel, it provides a rigid, confidence-inspiring structure built to endure heavy recovery loads and sustained off-road use. Raised corners improve departure angles, allowing the Gladiator to clear obstacles more efficiently, while the rugged two-stage textured black finish helps guard against corrosion, chips, and long-term wear. More than just armor, the XRC Gen 3 rear bumper functions as a complete rear recovery and utility system. It supports rear-mounted winches up to 5,000 lbs, includes welded recovery and jack points, and features integrated provisions for auxiliary backup lighting to improve visibility in low-light or confined conditions. This bumper is built for drivers who rely on their equipment when trails get remote and recovery becomes essential.

MISSION-CRITICAL STRENGTHS

- Heavy-Duty Steel Construction – Manufactured from 3/16-inch cold-rolled steel for exceptional rigidity and long-term durability.
- Winch-Ready Rear Recovery – Supports most ATV winches up to 5,000 lbs for dependable rear recovery capability.
- Integrated Recovery Points – Welded D-ring mounts and jack points provide secure attachment locations for recovery and lifting.
- Auxiliary Lighting Provisions – Built-in cutouts allow installation of backup or auxiliary lights for improved rear visibility.
- Vehicle-Specific Fitment – Engineered specifically for the 2020+ Jeep Gladiator JT for proper alignment and secure mounting.
- Warranty-Backed Confidence – Supported by a limited lifetime structural and 5-year finish warranty
